## **Test2.cs Step-by-Step Test Flow**

- 1. Launch browser and log in as "davred".
- 2. Assert the main page loads successfully after login.
- 3. Navigate to the "View People" tab.
- 4. Assert the page title and presence of "Database Records".
- 5. Assert required buttons ("Output Options", "Return to Home", "Delete Records") are present.
- 6. Assert the data grid and required column headings exist.
- 7. Assert the "Family Name" column is sorted  $A \rightarrow Z$ .
- 8. Click "Year of Birth" column to sort and assert sorting.
- 9. Click "Family Name" column to return sort and assert sorting.
- 10. Find the "William Smith, Male, 1985" record and click Edit.
- 11. On the Edit screen, change Forename to "William T." and Year of Birth to "1990", then save.
- 12. Assert the updated record ("William T. Smith, Male, 1990") appears in the grid.
- 13. Edit the record again, revert Forename to "William" and Year of Birth to "1985", then save.
- 14. Assert the reverted record ("William Smith, Male, 1985") appears in the grid.
- 15. Click Delete for "William Smith, Male, 1985".
- 16. On the Delete Confirmation screen, assert Forename, Family Name, and Gender.
- 17. Click "Back to List" and assert return to the main grid.
- 18. Click Delete for "William Smith, Male, 1985" again.
- 19. On the Delete Confirmation screen, confirm deletion.
- 20. Assert the user is returned to the main grid and the record is deleted.
- 21. Click the user dropdown and log out.
- 22. Assert the login screen is displayed.
